

PRESS RELEASE  
Musikmesse 2008

**Fidock Handcrafted Drums**

Date of release: 28<sup>th</sup> January 2008

**FIDOCK HANDCRAFTED DRUMS LAUNCHES NEW AUSTRALIAN PREMIUM SNARE**

Fidock Handcrafted Drums is launching a new range of premium quality Australian snares at Musikmesse Frankfurt 2008.

Fidock Handcrafted Drums is a new Australian drum manufacturer making elite wood snare drums from individually selected timbers. Each drum is unique, all are designed and constructed for professional use.

Fidock snare drums are musical and rich in tone. They are articulate, clean, responsive and robust. From hushed press rolls to powerful single strokes and devastating rim shots, a Fidock snare drum is a formidable force at the heart of any drum kit.

Fidock drums are the result of serious R&D, which combines the best established construction techniques and innovation.

The snare shell is a stave construction cut very thin for maximum tone and resonance and includes reinforcement rings and rounded bearing edges to complete a versatile and mature instrument.

Fidock Premium snare drums come with solid timber matched wooden hoops which are steam bent and designed for increased stick contact.

Fidock Handcrafted Drums also offer the same shell construction with triple flanged hoops for a slightly more economical package.

Prices range from 820€ to 950€ (excl taxes and delivery charges).

Fidock Handcrafted Drums is represented at Musikmesse by Stephan Fidock from 12 March to 15 March 2008.

A selection of snare drums are on display at Fidock Handcrafted Drums stand - Hall 3, stand B 57. For more information please visit: [www.fidockdrums.com](http://www.fidockdrums.com)
